May, 2026	Canadian Championships	TBC	All Qualified athletes L5 to Senior
July 2nd, 2026	Naming of the World Games Disciplines National Team	Virtual	Senior, Development, Junior

SELECTION PROCEDURE

1. GENERAL ELIGIBILITY

Athletes competing in the Junior, L6, or Senior category will appear on the ranking list.
Only athletes on the National Team Ranking List are eligible:

DOUBLE MINI & TUMBLING
• Be named to the Senior, Junior and Development National Teams. • Participate as a Canadian Team Member in FIG World Cups, World Championships or other FIG sanctioned event.

2. NATIONAL TEAM SIZE

The National Team will consist of the maximum of the top names on the National Ranking List for the following categories:

Discipline	Senior Women	Senior Men	Development Team (17-21) Women	Development Team (17-21) Men	Junior Women	Junior Men
DMT, TUM	8	8	6	6	4	4

*The Senior National Women's and Men's team could increase to a maximum of 12, depending on results of the World Championships Selection (see World Championships Selection Document).

3. NATIONAL TEAM RANKING LIST CALCULATION

All athletes will have a ranking score calculated using the following calculation, based on the results of the 2026 TG Elite Canada and the 2026 TG Canadian Championships,
*Note: Canadian Bonus will be included in the National Team Ranking List

DOUBLE MINI and TUMBLING
Junior, Development and Senior Team: The sum of: A. The total from best Q1 (2 pass total) B. Highest single pass score (from any round) C. Next highest single pass score (from any round) *Scores counting for B and C cannot come from the same round as item A

See event calendar on page 1 for dates and locations.

4. NATIONAL TEAM TRIAL SCORE SUBSTITUTION

In calculating the National Team ranking standards, athletes will be allowed to use an international score from a designated international event, World Championships and World Age Group Championships from the previous calendar year to replace one component of a National Team Trial score.

Athletes may substitute a maximum of one (1) score from the following:

DOUBLE MINI	TUMBLING
• Total Q1 score • Single pass score	• Total Q1 score • Single pass score

*Valid International events are listed at the top of this document under Important Dates.

Canadian Bonus will be added to the scores from the above mentioned events, following review and verification of the Canadian FIG judge who was in attendance at the event.

5. NAMING IF THE NATIONAL TEAM

The National Team will be named once per year. For 2026, it will be named on July 2nd.

6. NATIONAL TEAM RANKING LIST SORTING

The National Team Ranking List will consist of each athlete who has met the National Team score or higher standard and corresponding DD in one of the two (2) National Team Trials or designated International Event (for TUM and DMT, score and DD are required to be achieved in the same round).

Please refer to the 2026 Qualifying Standards document for all score requirements. (Also can be found in Appendix A).

Athletes can achieve the minimum degree of difficulty and score at valid international events listed at the top of this document under Important Dates.

Until the official naming of the National team, athletes can appear on both the Senior and Development ranking list if they are eligible (17-21). After the official naming of the teams, Senior National Team members will be removed from the Development National Team List.
For each event and category, athletes will be listed by gender, sorted by:
Degree of difficulty requirement met (DD set to YES): meaning the minimum degree of difficulty has been achieved.

The ranking list will be sorted by the total points by descending order up to a maximum of 12 (twelve) athletes.

There will be columns to check whether the minimum DD, minimum National Team Standard, have been met. Athletes who have the appropriate check marks for an event will be selected before those who have missing requirements. There is no guarantee that athletes with missing requirements will be asked to fill incomplete teams.

**** Meeting only the degree for difficulty requirement will not qualify an athlete for a ranking**

7. NATIONAL TEAM RANKING LIST TIE-BREAKING

The following procedure will be used to break a tie in the total ranking score:

1. If there a tie, then the athlete with the highest qualification (preliminary) round score in any of the two (2) National Team Trials of the current ranking period shall be ranked higher.
2. If there is still a tie, then the athlete with the highest total for a set of two (2) passes in either Qualification or Finals in any of the two (2) trials of the current ranking period shall be ranked higher.
3. If there is still a tie, the athlete with the single highest pass score shall be ranked higher.
4. If there is still a tie, the athlete with the highest ranking at the most recent Canadian Championships shall be ranked higher.

8. NATIONAL TEAM RANKING LIST TRACKING

Gymnastics Canada will track rankings for the athletes in the following categories:

A. Senior (17+)
B. Development (17-21)
C. Junior (13-16)

9. INJURY SCORES FOR NATIONAL TEAM TRIALS

National Team standards cannot be achieved on injury score alone.
In the case of illness, injuries or pregnancy preventing an athlete taking part in one of the National Team Trials, a substitute score will be created for Q1 only for the missed competition. The score for the Q1 routines will be equal to 90% of the athletes' Q1 results from the most recent domestic trial (2025 Third Trials). Only one injury score will be given per calendar year.

If an athlete is injured in warm up prior to the start of Q1 or during Q1, the athlete will receive an injury score for their Q1.

In order to receive an injury score, notification in writing from a doctor (or NT IST) is required, prior to the competition. If a withdrawal due to illness or injury occurs during a National Team Trial, it must be supported by an assessment of a Gymnastics Canada National Team IST Medical or Team Doctor on-site for an athlete to receive an injury score. Missing a competition or Trials because of school or work does not constitute a valid reason to obtain an injury score.

10. NATIONAL TEAM AGREEMENT AND MONITORING

A contract will be signed by all athletes and coaches wishing to take part in the National Team Program. This will include full commitment to the program regarding various aspects such as training on apparatus, conditioning, on-going monitoring, participation in training camps and other activities, dress code, and injury reporting, as well as other identified clauses.

For all disciplines, on-going monitoring, reporting of training, and video verification will be used as a tool to follow progression, to understand reality of training, to perform correlation between training and training camp or competition performances. This will be a communication tool for the Discipline Advisors to better assist each athlete. Repeated failures to submit monitoring, and lack of competition readiness can lead to sanctions such as non-selection to events.
